Dale,

I would like to write this email to you to thank you and your team for the great job that you did for us here at Thanksgiving Park Phase 6 Project. In an industry that seem to point out problems more than accomplishments.... My hopes are to change that at the very least on this project.

Let me start by saying you Dale were fantastic on this project. You did a great job of getting the steel produced and delivered so that the project could stay ahead of schedule.

Now, please let me try with my words to describe my thoughts and feeling for J&M Steel. This contractor you have working for you for the installation of the structural steel (J & M Steel) has no equal. In my 28 years of working in the construction industry I have dreamed of having a structural steel installer like this company but my dreams fell short of J&M Steel. The professionalism, the attention to detail, the caring of the finished product, their willingness to work with all others on the project without complaint, even under their breath, the caring of the master schedule and even more over my 4 week schedule to push the work on even faster and always the answer was yes we can. I truly hope other steel erection contractors have a chance to see J&M Steel in action some time so they can see how the best does it.

Thank you for the opportunity to work with you and your team. They truly made my job much easier.

Sincerely,

Dave Lange
